- A trusted recommended solution that is customized and tailored exactly to your business's needs. One that is scalable, affordable, and most importantly very ergonomic (user friendly)
- A plan to ensure seamless continuity into the existing business model (so it doesn't slow you down)
- A detailed disaster recovery binder that includes all your I.T. technical data (A \$1000 normal charge by itself)

AN AMAZING CASE STUDY

ICCS ran an analysis on a southeast medical company with multiple offices this summer. Our results were shocking!! We found equipment with failing parts, data that hadn't been backed up in years and that they were over spending. Our recommendation implemented centralized services, fail save backups and new network structures. **The new solution cut this company's costs \$50,000 a month (\$600,000 savings a year).**

Scott Raymer, CEO: "We knew we could help but we had no idea how much impact we could make. It's a good feeling to help a business like this. Our report is worth the look."
